

Carly Peterson, MSc – Genetic Counselor

Carly graduated from the University of Colorado—Boulder in 2020 with a Bachelor’s degree in Chemical and Biological Engineering. She then went on to obtain her Master’s degree from the University of Colorado—Anschutz in Genetic Counseling and graduated in 2022. During graduate school, Carly’s research focused on parenting stress in raising children with sex chromosome aneuploidies. She presented her research as a platform presentation at the 2022 ACMG Annual Clinical Genetics Meeting and received the Carolyn Mills Lovell Genetic Counselor Award. After graduation, Carly began working at the Colorado Center for Reproductive Medicine. At CCRM, Carly works as a clinical genetics researcher as well as a genetic counselor for patients pursuing IVF. Outside of work, Carly enjoys traveling, exploring Colorado, and hiking.
