

## **Catherine Boreas, BS - Research Lab Assistant**

Catherine graduated from Kansas State University in 2016 with a Bachelor's degree in Animal Science and Industry, with a focus in Biotechnology and Bioscience. After completing her degree, she spent 5 years working within the Rabies laboratory at Kansas State University's College of Veterinary Medicine, performing Rabies titer testing in the role of Research Assistant. Her love for the mountains and outdoors eventually drove her to move to Colorado, where she found her role within CCRM as the Research Lab Assistant. In this role, Catherine hopes to broaden her understanding of IVF research and the world of reproductive medicine. When Catherine is not at work, she can be found hiking, exploring the outdoors, or checking out local breweries.
