

Deirdre Logsdon, MS - Research Embryologist

Deirdre graduated from the University of Colorado—Boulder in 2011 with a Bachelor's degree in Molecular, Cellular, and Developmental Biology. After two years as a high school Science teacher and four years as a clinical andrologist, she received her M.S. in Biomedical Sciences, with an emphasis in Assisted Reproductive Technologies from Colorado State University in 2017. Her main research focuses include investigating the initiation of implantation and the establishment of a healthy placental trophoblast population, as well as optimizing pre-implantation embryo culture conditions. Deirdre was initially drawn to the reproductive field because she is impassioned to help improve the health of mothers and their babies.
