

## **Grace Matsey, BSc – Research Embryologist**

Grace Matsey received her bachelor's degrees in Molecular Cellular Developmental Biology and Neuroscience, with a Music Minor and a Certificate in Public Health from the University of Colorado at Boulder in May of 2022. She was going to be working as a Research Intern in the Summer of 2020, but COVID-19 disrupted those plans. She instead began working for the nursing teams as a COVID-19 Screening Assistant. She then became an intern for the CCS and Research Labs in the Summer of 2021. Grace is now a permanent member of the team as a Research Embryologist for CCRM. When not at work, Grace is visiting her friends in Boulder, playing boardgames, doing crafts, or hiking.
