

Heather Rogers, MS – Research Embryologist

Heather graduated from the University of St. Thomas in St. Paul, Minnesota in 2009 with a Bachelor's degree in Biochemistry and was immediately commissioned as an officer in the U.S. Air Force. After ten years of active duty, she decided to return to school to pursue a graduate degree in Biomedical Sciences, with an emphasis in Assisted Reproductive Technologies from Colorado State University. As a research embryologist, Heather's current focus is deriving and characterizing new embryonic stem cell lines. These cell lines will be used to study infertility and reproductive pathologies with the goal of optimizing IVF treatments. When Heather is not at work, she enjoys exploring the Colorado outdoors with her dogs.
