

Jack Davis, BSc – Molecular Lab Technician

Jack graduated from the University of Colorado—Boulder in 2021 with Bachelor's degrees in Molecular Cellular, and Developmental Biology and Neuroscience. While studying at Boulder, he worked in Dr. Zoe Donaldson's lab where he completed an Honors thesis investigating the role of opioid and oxytocin signaling in pair-bond maintenance of monogamous prairie voles. He also worked in CU's COVID monitoring lab where he performed testing and research investigating the metabolic signatures of COVID-19. After graduating, he began work at CCRM as a molecular lab technician doing preimplantation genetic testing and fertility research. In his free time, Jack enjoys spending time with his friends, playing guitar and participating in community projects.
